# Tribhuvan University **Institute of Science and Technology** B.Sc. Entrance Examination Model question 2080

### **Instructions:**

A. The distributions of questions are as follows:

|          |         | Group A   | Group B            | Group C       |
|----------|---------|-----------|--------------------|---------------|
|          | Subject | Chemistry | Biology            | English       |
|          |         | OR        | OR                 | Aptitude Test |
|          |         | Physics   | <b>Mathematics</b> | -             |
|          | Marks   | 40        | 40                 | 20            |
| <u>.</u> | .• •    | 11 1 1 C  | 11 0 10 0 1        |               |

- B. Questions will be asked from 11 & 12 Curriculum of NEB, Nepal
- C. Attempt all questions.

Full marks: 100

Time: 2 hrs

#### **Group A**

| (You are strongly advised to atten | npt either <i>Chemistry</i> or <i>Physics</i> ) |
|------------------------------------|---|
| Chemistry                          | <b>40 x 1 = 40 Marks</b>                        |

| 1. Which of the following elements does not contain neutron?                    |  |    |                   |
|---|--|----|-------------------|
| 1. Which of the following elements does not contain neutron?                    |  |    |                   |
| a)  | Н  | c) | Be                |
| b)  | He                                       | d) | Li                |
| 2. The n  | umber of unpaired electrons in oxygen i  | s  |                   |
| a)  | 2  | c) | 4                 |
| b)  | 3  | d) | 6                 |
| 3. The u  | nit of radioactivity is                  |    |                   |
| a.  | Fajan                                    | c. | Curie             |
| b.  | Bohr                                     | d. | Debye             |
| 4. Which of the following compounds gives positive AgNO <sub>3</sub> test?      |  |    |                   |
| a.  | $\mathrm{CCl}_4$                         | c. | CHCl <sub>3</sub> |
| b.  | CH <sub>3</sub> Cl                       | d. | NaCl              |
| 5. 'At same temperature and pressure equal volume of all gases has same         |  |    |                   |
| number  | of molecules'. This statement belongs to | )  |                   |
| a.  | Boyle's law                              | c. | Charles' law      |
| b.  | Avogadro's law                           | d. | Graham's law      |
| 6. A gas diffuses 4 times as fast as $O_2$ . The molecular weight of the gas is |  |    |                   |
| a.  | 4  | c. | 16                |
| b.  | 8  | d. | 2                 |

| Name  |                                   |  |  |  |
|---|-----------------------------------|--|--|--|
| 7. In a solution containing 1 mole alcohol and 4 mole water, the mole fraction of |                                   |  |  |  |
| alcohol is  |                                   |  |  |  |
| a. 1/4  | c. 4/5                            |  |  |  |
| b. 3/4  | d. 1/5                            |  |  |  |
| 8. The oxidation number of Mn in MnO <sub>2</sub> is                              |                                   |  |  |  |
| a. +2   | c. + 6                            |  |  |  |
| b. +4   | d. +7                             |  |  |  |
| 9. Vapour pressure at equilibrium of a liquid i                                   | n a closed vessel depends only on |  |  |  |
| a. Concentration  | c. Pressure                       |  |  |  |
| b. Temperature  | d. Volume                         |  |  |  |
| 10. Ethylene reacts with alkaline KMnO <sub>4</sub> (Bay                          | ver's reagent) to form            |  |  |  |
| a. Oxalic acid  | c. Glycerol                       |  |  |  |
| b. Acetic acid  | d. Glycol                         |  |  |  |
| 11. The crystalline form of carbon is   |                                   |  |  |  |
| a. Diamond  | c. Fullerene                      |  |  |  |
| b. Graphene   | d. All of the above               |  |  |  |
| 12. Froth floatation process is done for  |                                   |  |  |  |
| a. Oxide ore  | c. Carbonate ore                  |  |  |  |
| b. Sulphide ore   | d. Nitrate ore                    |  |  |  |
| 13.4 g NaOH in 1 L solution is  |                                   |  |  |  |
| a. 1N   | c. 4N                             |  |  |  |
| b. 0.1N   | d. 0.4N                           |  |  |  |
| 14. The rate constant of a reaction depends up                                    | on                                |  |  |  |
| a. Temperature  | c. Time of the reaction           |  |  |  |
| b. Initial concentration  | d. Extent of reaction             |  |  |  |
| 15. When a solid is converted into liquid, entropy will                           |                                   |  |  |  |
| a. Remain same  | c. Decrease                       |  |  |  |
| b. Become zero  | d. Increase                       |  |  |  |
| 16. Lassaigne's test is not used to detect which one of the following elements in |                                   |  |  |  |
| organic compounds?  |                                   |  |  |  |
| a. S  | c. Br                             |  |  |  |
| b. N  | d. C                              |  |  |  |
| 17. CH <sub>4</sub> is a/an   |                                   |  |  |  |
| a. Alcohol  | c. Ether                          |  |  |  |
| b. Ketone   | d. Alkane                         |  |  |  |

| Exam Roll No.:  | Signature:                        |  |  |  |
|---|-----------------------------------|--|--|--|
| 18. Ethyne on polymerization gives  |                                   |  |  |  |
| a. Polythene  | c. Phenol                         |  |  |  |
| b. Benzene  | d. Ethane                         |  |  |  |
| 19. Toluene on oxidation with alkaline KMnC   |                                   |  |  |  |
| a. Benzoic acid   | c. Benzaldehyde                   |  |  |  |
| b. Phenol   | d. Aniline                        |  |  |  |
| 20. Which of the following is a Friedel Craft's   | s catalyst                        |  |  |  |
| a. AlCl <sub>3</sub>  | c. PCl <sub>5</sub>               |  |  |  |
| b. $H_2SO_4$  | d. CH <sub>3</sub> COCl           |  |  |  |
| 21. The molecular formula of blue vitriol is  |                                   |  |  |  |
| a) CuSO <sub>4</sub>  | c) $CuSO_4.5H_2O$                 |  |  |  |
| b) $ZnSO_4.7H_2O$   | d) ZnSO <sub>4</sub>              |  |  |  |
| 22. Pure water always contains hydrogen a   | nd oxygen in 1:8 ratios by mass.  |  |  |  |
| This is best explained by   |                                   |  |  |  |
| a) Law of conservation of mass  |                                   |  |  |  |
| <ul><li>b) Law of constant proportions</li><li>23. How many moles of CO<sub>2</sub> are there</li></ul> |                                   |  |  |  |
| a) 44 moles   | c) 1 mole                         |  |  |  |
| b) 4.4 moles  | d) 0.1 mole                       |  |  |  |
| <i>c)</i>   | <i>a)</i> or more                 |  |  |  |
| 24. Which one of the following molecule moment?   | s is expected to have zero dipole |  |  |  |
| a) H <sub>2</sub> O   | c) $SO_2$                         |  |  |  |
| b) $CO_2$   | d) $CaF_2$                        |  |  |  |
| 25. Oxidation number of chlorine varies from  | om                                |  |  |  |
| a) +1 to -1   | c) -1 to +7                       |  |  |  |
| b) 0 to +7  | d) -7 to +7                       |  |  |  |
| 26. The real gases show ideal behavior at   |                                   |  |  |  |
|   | c) High temperature and high      |  |  |  |
| pressure<br>b) Low temperature and high   | pressure                          |  |  |  |
| b) Low temperature and high or pressure   | pressure                          |  |  |  |
| 27. The atomicity of nitrogen and phospho   |                                   |  |  |  |
| a) 2 and 5  | c) 2 and 2                        |  |  |  |
| b) 2 and 3  | d) 2 and 4                        |  |  |  |
| 28. Aqueous solution of sodium acetate is   |                                   |  |  |  |
| a) Neutral  | c) Strongly acidic                |  |  |  |
| b) Weakly acidic  | d) Alkaline                       |  |  |  |
|   |                                   |  |  |  |

| Name  |                               |  |  |
|---|-------------------------------|--|--|
| 29. Half-life period of which order reaction is independent of initial  |                               |  |  |
| concentration of reactant?  |                               |  |  |
| a) Zero   | c) Second                     |  |  |
| b)First   | d) Third                      |  |  |
| 30. A well stoppered thermos flask conta                                | ains some ice cubes. It is an |  |  |
| example of  | X <b>X 1</b> / <b>1</b> /     |  |  |
| a) Open system  | c) Isolated system            |  |  |
| b) Closed system  | d) Non-thermodynamic system   |  |  |
| 31. Which of the followings is not a type $C$                           |                               |  |  |
| a) Cu   | c) Fe                         |  |  |
| b) Cr   | d) Zn                         |  |  |
| 32. Alumino thermic process is used for                                 |                               |  |  |
| a) Al   | c) Cr                         |  |  |
| b) Fe   | d) Zn                         |  |  |
| 33. Anode used in Down's cell is  |                               |  |  |
| a) Iron   | c) Platinum                   |  |  |
| b) Graphite   | d) Carbon rod                 |  |  |
| 34. Anomalous electronic configurations                                 |                               |  |  |
| a) Fe and Cu  | c) Cr and Cu                  |  |  |
| b) Cr and Fe  | d) Cu and Zn                  |  |  |
| 35. The chief ore of mercury is   |                               |  |  |
| a) Calamine   | c) Cyrolite                   |  |  |
| b) Cinnabar   | d) Clay                       |  |  |
| 36. Which organic compound was synthesized first in laboratory from its |                               |  |  |
| elements?<br>a) Urea  | c) Ethyl alcohol              |  |  |
| b) Methane  | d) Acetic acid                |  |  |
| 37. Two consecutive members of a home                                   | ,                             |  |  |
| other by  |                               |  |  |
| a) $-CH_2$ group  | c) –CH group                  |  |  |
| b) $-CH_3$ group  | d) $-CH_2CH_3$ group          |  |  |
| 38. The IUPAC name of $CH_3CHO$ is                                      |                               |  |  |
| a) Ethanal  | c) Formaldehyde               |  |  |
| b) Methanal   | d) Acetaldehyde               |  |  |
| 39. Ethyl bromide on treatment with                                     | aqueous KOH gives             |  |  |
| a) Ethanal  | c) Ethylene                   |  |  |
| b) Ethane   | d) Ethanol                    |  |  |

| Exam Roll No.: Signature:   |   |  |  |  |
|---|---|--|--|--|
| 40. Esterification is the reaction between                                      |   |  |  |  |
| a) Alcohol/acid chloride  | c) Alcohol/aldehyde                     |  |  |  |
| b) Alcohol/acid anhydride   | d) Alcohol/carboxylic acid              |  |  |  |
|   | OR                                      |  |  |  |
|   |   |  |  |  |
| Physics   | 40 x 1 = 40 Marks                       |  |  |  |
| 1. The S.I. unit of the universal gas con                                       |   |  |  |  |
| a. JK <sup>-1</sup> mol <sup>-1</sup>   | c. $J^{o}Cmol^{1}$                      |  |  |  |
| b. JK <sup>-1</sup>   | d. Calg <sup>-1</sup>                   |  |  |  |
| 2. Which of the following quantities rer constant speed in a horizontal circle? | · ·                                     |  |  |  |
| a) Time   | c) Acceleration                         |  |  |  |
| b) Velocity   | d) K.E.                                 |  |  |  |
| -   | ximum when angle between them is        |  |  |  |
| a) 0°   | c) 180°                                 |  |  |  |
| b) 90°  | d) 30°                                  |  |  |  |
| 4. A body of rest may have  |   |  |  |  |
| a) Velocity   | c) Momentum                             |  |  |  |
| b) Speed  | d) Energy                               |  |  |  |
| -   | collide. Which quantity is conserved?   |  |  |  |
| a) Temperature  | c) Velocity                             |  |  |  |
| b) Kinetic energy   | d) Momentum                             |  |  |  |
| 6. A particle is moving in a circle with  | -                                       |  |  |  |
| <ul><li>a) Velocity</li><li>b) Acceleration</li></ul>                           | c) Kinetic energy                       |  |  |  |
| ,<br>,  | d) Displacement                         |  |  |  |
| 7. To stop a rigid body from rotating ab  |   |  |  |  |
| a) Momentum   | c) Torque                               |  |  |  |
| b) Force  | d) Pressure                             |  |  |  |
| 8. Shearing strain is expressed by  |   |  |  |  |
| a) Angle of twist   | c) Increase in volume                   |  |  |  |
| b) Angle of shear   | d) Decrease in volume                   |  |  |  |
| 9. Which of the following thermometer   | s is used to measure the temperature of |  |  |  |
| the Sun?  |   |  |  |  |
| a) Gas thermometer  | c) Mercury thermometer                  |  |  |  |
| b) Pyrometer  | d) Vapour pressure thermometer          |  |  |  |
| •   | <b>^</b>                                |  |  |  |

| Name   |                                       |                             |  |
|--|---------------------------------------|-----------------------------|--|
| 10. The efficiency of a Carnot's engine working in between 1000K and 300K is |                                       |                             |  |
| a) 0%  | c)                                    |                             |  |
| b) 99 %  | d)                                    | 70 %                        |  |
| 11. The twinkling of stars in the sky is d                                   | ue to                                 |                             |  |
| a) Reflection  | c)                                    | Polarization                |  |
| b) Refraction  | d)                                    | Diffraction                 |  |
| 12. For which of the following colors is                                     | s the maxim                           | um angle of deviation for a |  |
| prism?   |                                       |                             |  |
| a) Red   | c)                                    | Blue                        |  |
| b) Violet  | d)                                    | Green                       |  |
| 13. A long-sighted person uses spectacle                                     | es fitted with                        |                             |  |
| a) Cylindrical lenses  | c)                                    | Concave lenses              |  |
| b) Plano-convex lenses   | d)                                    | Convex lenses               |  |
| 14. Velocity of sound in a vacuum is   |                                       |                             |  |
| a) Zero  | c)                                    | 150 m/s                     |  |
| b) 330 m/s   | d)                                    | 500 m/s                     |  |
| 15. Buzzing of a mosquito is   |                                       |                             |  |
| a) Shrill sound  | c)                                    | Pleasant sound              |  |
| b) Loud sound  | · · · · · · · · · · · · · · · · · · · | Flat sound                  |  |
| 16. The forces responsible to hold the ele                                   | ectrons in ar                         | atom are                    |  |
| a) Nuclear forces  | c)                                    | Gravitational forces        |  |
| b) Coulomb forces  | d)                                    | Vander Waal's forces        |  |
| 17. The ground state energy of hydrogen                                      |                                       |                             |  |
| a) 13.6 eV   | c)                                    | 13.6 Joule                  |  |
| b) 13.6 MeV  | d)                                    | 3.4 eV                      |  |
| 18. 1 atomic mass unit is equal to   |                                       |                             |  |
| a) 1/12 (mass of one O atom)   | · · · · · ·                           | · ·                         |  |
| b) 1/12 (mass of one H atom)   |                                       | nass of one O2 molecule)    |  |
| 19. The process used in the atom bomb i                                      | S                                     |                             |  |
| a) Fusion  | c)                                    | Ionization                  |  |
| b) Fission   | d)                                    | Electrolysis                |  |
| 20. The energy stored in a charged capacitor is in the form of               |                                       |                             |  |
| a) Kinetic energy  | c)                                    | Magnetic energy             |  |
| b) Potential energy  | d)                                    | Elastic energy              |  |

| Exam Roll No.:                                       | Sig   | gnature:                              |
|--|-------|---------------------------------------|
| 21. The direction of the magnetic field produced     |       |                                       |
| current is given by                                  | •     | <i>c i c</i>                          |
| a) Fleming's left-hand rule                          | c)    | Biot and Savart law                   |
| b) Ampere's law                                      | d)    | Right-hand thumb rule                 |
| 22. For wattless current in an a. c. circuit, the    | phas  | e difference between current          |
| and voltage must be                                  |       |                                       |
| a) π   | c)    | 2π                                    |
| b) π/2   | d)    | $\pi/4$                               |
| 23. Which substance is used to make a permane        | ent n | nagnet?                               |
| a) Ferromagnetic                                     |       | Diamagnetic                           |
| b) Paramagnetic                                      | d)    | Electromagnetic                       |
| 24. The fractional change due to temperature         |       | · ·                                   |
| is called  |       | , , , , , , , , , , , , , , , , , , , |
| a) Linear expansion                                  | c)    | Superficial expansion                 |
| b) Apparent expansion                                | d)    | Volume expansion                      |
| 25. An adiabatic process occurs at constant          |       |                                       |
| a) Temperature                                       |       | Heat energy                           |
| b) Pressure  |       | Entropy                               |
| 26. Water is freezing at 0°C and converting to       | o ice | e. During this process, the           |
| specific heat of water is                            | ,     |                                       |
| a) Zero  | c)    | One                                   |
| b) Infinity  |       | Less than one                         |
| 27. The note of lowest frequency is called the       |       | Deata                                 |
| a) Fundamental note                                  |       | Beats                                 |
| b) First overtone                                    | d)    | Octave                                |
| 28. Quality of a sound depends upon                  |       | A mulitudo                            |
| <ul><li>a) Wavelength</li><li>b) Frequency</li></ul> |       | Amplitude<br>Overtones                |
| 29. A convex mirror has a radius of curvature        |       |                                       |
| placed 14 cm away from the mirror, the in            |       | -                                     |
|  | -     | 33 cm front                           |
| · · · · · · · · · · · · · · · · · · ·                |       | 33 cm behind the mirror               |
| 30. The critical angle for a material to air is 3    |       |                                       |
| a) 1.0   |       | 2.0                                   |
| b) 1.5   |       | 3.0                                   |
| 31. The far point of a normal eye is                 | )     |                                       |
| a) 25 cm   | c)    | 1 km                                  |
| b) 50 cm   | d)    | Infinity                              |
|  |       |                                       |

| Name  |                                  |  |  |
|---|----------------------------------|--|--|
| 32. Velocity of light is maximum in   |                                  |  |  |
| a) Water  | c) Diamond                       |  |  |
| b) Vacuum   | d) Glass                         |  |  |
| 33. The work done in moving a charge on   | n equipotential surface is       |  |  |
| a) Always zero  | c) Greater than zero             |  |  |
| b) Sometimes zero and   | d) Infinity                      |  |  |
| sometimes less than zero  |                                  |  |  |
| 34. The plates of a parallel plate capacitor  | rs exert on each other           |  |  |
| a) Repulsive force  | c) Attractive force              |  |  |
| b) No force   | d) Attractive and repulsive both |  |  |
|   | forces                           |  |  |
| 35. The thermal speed of electrons is of th   |                                  |  |  |
| a) $10^3 \text{ m/s}$   | c) $10^{-3}$ m/s                 |  |  |
| b) $10^6 \text{ m/s}$   | d) 10 <sup>-6</sup> m/s          |  |  |
| 36. A moving charge produces  |                                  |  |  |
| a) No field   | c) Electric field only           |  |  |
| b) Electric and magnetic fields both  | d) Magnetic field only           |  |  |
| 37. The resistance of an ideal ammeter is   | X XX 1                           |  |  |
| a) Low  | c) High                          |  |  |
| b) Infinite   | d) Zero                          |  |  |
| 38. The peak voltage of 220 V AC mains $x = 211 \text{ V}$  |                                  |  |  |
| a) 311 V<br>b) 155.5 V  | c) 220 V<br>d) 440 V             |  |  |
| ·   | ,                                |  |  |
| 39. The ratio of energies of H atom in its f<br>a) $\frac{1}{4}$  | c) 9/4                           |  |  |
| b) 4/9  | d) 4                             |  |  |
| /   |                                  |  |  |
| 40. The half life (T) and disintegration constant ( $\lambda$ ) of a radioactive substance are related as |                                  |  |  |
| a) $\lambda T = 1$  | c) $T/\lambda = 0.693$           |  |  |
| b) $\lambda T = 0.693$  | d) $\lambda/T = 0.693$           |  |  |
| -,  |                                  |  |  |

| b. Bone   | d. In the cheek wall              |  |  |  |
| 46. Yolk plug is seen in                                  |                                   |  |  |  |
| a. Blastula   | c. Morula                         |  |  |  |
| b. Gastrula   | d. Cleavage                       |  |  |  |
| 47. Movement of food in the intestine is by               | у                                 |  |  |  |
| a. Flowing  | c. Peristalsis                    |  |  |  |
| b. Osmosis  | d. Active motion                  |  |  |  |
| 48. The amount of air always present in lu                | ngs is                            |  |  |  |
| a. Tidal volume   | c. Vital capacity                 |  |  |  |
| b. Alveolar capacity                                      | d. Residual volume                |  |  |  |
| 49. Central nervous system consists of                    |                                   |  |  |  |
| a. Brain only   | c.Brain and spinal cord both      |  |  |  |
| b. Spinal cord only                                       | d. Brain and autonomous system    |  |  |  |
| 50. Typhoid is the disease in which there is infection of |                                   |  |  |  |
| a. Kidney   | c. Stomach                        |  |  |  |
| b. Heart  | d. Lung                           |  |  |  |
| 51. Crossing over occurs in                               |                                   |  |  |  |
| a. Leptotene  | c. Pachytene                      |  |  |  |
| b. Zygotene   | d. Diplotene                      |  |  |  |
| 52. Eukaryotic unicellular organism belongs to            |                                   |  |  |  |
| a. Mycota   | c. Monera                         |  |  |  |
| b. Protista   | d. Animalia                       |  |  |  |

Name ..... 53. Venter is a part of a. Sporogonium c. Gemma b. Antheridium d. Archegonium 54. Vascular cryptogam is a. Algae c. Bryophytes d. Pteridophytes b. Fungi 55. Synecology is the study of a. Individuals c. Environment b. Community d. Water 56. Palisade parenchyma is found in a Root c. Leaf b. Stem d. Fruit 57. Hypodermis in dicot stem is a. Parenchyma c. Sclerenchyma b. Collenchyma d. Aerenchyma 58. The water is transported up to the leaves through a. Xylem c. Cortex b Phloem d. Parenchyma 59. Codon is associated with **tRNA** c. rRNA a. b. mRNA d. DNA 60. Tendency of genes to get inherited together is called a. Sex linkage c. Linkage b. Recombination d. Co-dominance 61. Study of bird is a) Ornithology c) Phenology b) Anthropology d) Saurology 62. Ribosome in prokaryotic cell is a) 50 S type c) 80 S type b) 70 S type d) 40 S type 63. The nearest relatives of man are c) New world monkey a) Lemurs b) Old world monkey d) Ape

| 46. 20 is divided into two parts so that the p   | product of cube of one quantity and                       |
| square of the other quantity is maximum.   |   |
| a) 10,10   | c) 8,12   |
| b) 16,4  | d) 12,8   |
| 47. $\int \frac{e^{tan^{-1}x}}{1+x^2} dx$ is equal to  |   |
| a) $log (1 + x^2) + C$   | c) $e^{tan^{-1}x} + C$                                    |
| b) $log (e^{tan^{-1}x}) + C$   | d) $tan^{-1}x + C$  |
| 48. $\int_{1}^{e} \log x  dx =$  |   |
| a) <i>1</i>  | c) <i>e</i> +1  |
| b) <i>e-1</i>  | d) 0  |
| 49. If $i$ is imaginary unit, then the value of $i$  | $^{4n+3}$ is  |
| a) - <i>i</i>  | c) 1  |
| b) <i>i</i>  | d) -1   |
| 50. Determine the value of k if $f(x) = x^3 x+3$   | $+ kx^2 - kx + 10$ is divisible by                        |
| a) -3  | c) $\frac{17}{12}$  |
| b) $\frac{10}{17}$   |   |
| ±,   | d) $\frac{12}{17}$  |
| 51. The value of the determinant $\begin{vmatrix} 1 & w \\ w & w^2 \\ w^2 & 1 \end{vmatrix}$ | $\begin{bmatrix} w^2 \\ 1 \\ w \end{bmatrix}$ is equal to |
| a) 1   | c) $w^2$  |
| b) <i>w</i>  | d) 0  |
| 52. The equation of a circle with radius 5 and is  | · ·   |
|  | $x^2 + y^2 \pm 10x \pm 10y + 25 = 0$                      |
|  | $x^{2} + y^{2} \pm 10x \pm 10y + 51 = 0$                  |
| 53. The sum of first ten odd numbers is  |   |
| a) 100   | c) 81   |
| b) 90  | d) 50   |
| 54. How many permutations are there in the   | · ·   |
| a) 10  | c) 120  |
| b) 20  | d) 30   |
| 5) 20  | 4) 00   |

| Name   | •••   |

| 55. How many terms are there in the expansi                                      | on of $(x + y + z)^6$ ?                                 |
| a) 42  | c) 18   |
| b) 28  | d) 7  |
| 56. For what value of K, the points (k,1), (2,1)                                 | 1) and (4,5) lie on a line?                             |
| a) 0   | c) 2  |
| b) 1   | d) 3  |
| 57. The polar coordinates of the point $x = \sqrt{2}$                            | $\overline{3}, y = 1$ is                                |
| a) (2, $\pi/_6$ )  | c) (2, $\pi/3$ )  |
| b) (2, $\pi/2$ )   | d) (2, $\pi/4$ )  |
| 58. The angle between the lines $2x - y + 3 = 3$                                 | = 0 and x + 2y + 3 = 0 is                               |
| a) 900   | c) 450  |
| b) 600   | d) 300  |
| 59. The length of the tangent to the circle $2x^2 + 2y^2 - 3x + 5y + 9 = 0$ from |   |
| the point (2,-1) is  |   |
| a) 8   | c) 4  |
| b) 6   | d) 2  |
| 60. The focus of the parabola $y^2 + 12 = 4x$                                    | +4y is  |
| a) (2,3)   | c) (-2, 3)  |
| b) (3,2)   | d) (-3, 2)  |
| 61. If $\theta$ is the angle between two unit vectors                            | $\vec{a}$ and $\vec{b}$ , then sin $\theta$ is equal to |
| a) $\vec{a} + \vec{b}$   | c) $\vec{a} - \vec{b}$                                  |
| b) $\vec{a}.\vec{b}$   | d) $\left \vec{a} \times \vec{b}\right $                |
| 62. The number of non-empty proper subsets of the set $A = \{1, 2, 3, 4\}$ are   |   |
| a) 16  | c) 14   |
| b) 15  | d) 12   |
| 63. The period of $ \sin x   \cos x $ is   | X   |
| a) $\frac{\pi}{3}$   | c) π<br>d) 2π   |
| b) $\frac{\pi}{2}$   | u) 21   |
| 64. $\log(1 + 2 + 3)$ is equal to  |   |
| a) $\log 1 + \log 2 + \log 3$<br>b) $(1 - 1)(1 - 2)(1 - 2)$                      | c) $\log(1+3) + \log^2$                                 |
| b) (log1)(log2)(log3)  | d) $\log 1 + \log 3 - \log 2$                           |

Exam Roll No.:Signature:65. The system of equations 4x - 3y = 1 and 8x - 6y - 9 = 0 is a) Consistent and dependent c) Inconsistent and independent b) Consistent and independent d) Inconsistent and dependent 66. If A =  $\begin{bmatrix} a & o & o \\ o & a & o \\ o & o & a \end{bmatrix}$ , then |Adj(A)| =a)  $a^2$ c) a<sup>9</sup> d)  $a^{27}$ b) a<sup>6</sup> 67. If a, b, c are in G.P. and  $a^x = b^y = z^3$  then x, y, z are in c) H.P. a) A.P. d) None of these b) G.P. 68. Both the roots of the equation,  $ax^2 + bx + c = o$ ,  $a \neq o$  are zero if a) c = 0, b = 0c)  $b \neq 0, c = 0$ b)  $b = 0, c \neq 0$ d)  $b \neq 0, c \neq 0$ 69. The polar form of  $\frac{l+1}{l-1}$  is a)  $\cos\frac{\pi}{2} + i\sin\frac{\pi}{2}$ c)  $2\left(\cos\frac{\pi}{4} + i\sin\frac{\pi}{4}\right)$ b)  $4\left(\cos\frac{\pi}{2} + i\sin\frac{\pi}{2}\right)$ d)  $3\left(\cos\frac{2\pi}{2} + i\sin\frac{2\pi}{2}\right)$ 70. A man has 6 friends. The number of ways he can invite one or more to a party are a) 6! c) 63 d) 22 b) 23 71. The value of the series  $\frac{2}{1!} + \frac{4}{3!} + \frac{6}{5!} + \cdots$  is equal to c)  $\frac{e}{2}$ d)  $\frac{e}{3}$ a) e b) 2e 72. If  $cosec^2 x = cosec^2 \alpha$ , then general values of x is a)  $n\pi + \alpha$ c)  $n\pi + \alpha$ d)  $n\pi + (-1)^n \alpha$ b)  $2n\pi \pm \alpha$ 73. The area of the triangle formed by the straight line 2x + 3y = 6 with the coordinate axes (in sq. units) is a) 2 c) 6 b) 3 d) 1 74. The angle between the line pair represented by  $x^2 - 5xy + 4y^2 = 0$  is c)  $\tan^{-1}\left(\frac{3}{5}\right)$ a)  $\tan^{-1}\left(\frac{4}{2}\right)$ b)  $\tan^{-1}\left(\frac{4}{r}\right)$ d)  $\tan^{-1}\left(\frac{5}{2}\right)$
